6       NORMA JOY SCOTT: I'm Norma Joy Scott, my name,  
7   and I've been a resident of Mineral County for 67 years.  
8   And I firmly believe that Yucca Mountain is the best place  
9   in the United States to put the nuclear deposit. For years  
10   they made aboveground tests. The land is pretty well  
11   saturated with stuff. I can't see anything else that could  
12   go there. And I'm not afraid of what's being sent in  
13   there. Actually, I'm more afraid of what some of our  
14   trucks that we pass on the highway are hauling than I am  
15   the nuclear stuff.

16           That's enough.
